Perceptions Interior Design brings you creative solutions for your home's interior and exterior. By drawing from each unique project and client, we create spaces that are beautiful, classic, and elegant. We work with builders and homeowners through every phase of the design process to deliver visually stunning results. Our services extend to individual room makeovers for both new and existing homes. This includes furniture and accessory shopping, as well as staging the final scene.

After all, a person's *perception* depends in part on how you set the stage.

We've created an
A La Carte Menu of
Design Services for...

Commercial
Residential
Remodels
Additions
New Construction
Tenant Improvement

At SmartPartners Intelligent Interiors, our focus is to ensure the thoughts and ideas of the client are articulated in the overall design of a project. We create visions that engage everyone involved and enable the client by providing the knowledge and tools to make informed and educated decisions so they remain in control throughout the design process - from the initial consultation and preliminary concepts to the final built out space and well into occupancy.

Please include us as part of the selection process for your next project!
